Technology for people of limited mobility
Innovations
We know what you need

Petermann product ideas emerge exactly where they will be required and used later on – in day-to-day life. Every Petermann product has been developed to meet the requirements of caregivers and patients who need to master a sequence of movements. The Petermann teams are involved in the daily activities of caregivers and see every day the heavy the daily burden and challenge they face when caring for people with limited mobility.

Quality
Safe products for proficient care – Made in Germany

Many years of experience, the latest production technologies, innovative materials and the highest degree of care in production – These are some of the criteria that highlight the extraordinary quality of the Petermann aids.

Continual striving for perfection, finding even better materials and processing techniques – linked to systematic quality tests carried out in both our own laboratories and also in independent testing centres – enable Petermann GmbH to guarantee that all products fully match requirements for medical products. They are therefore free of any hazardous substances and also withstand the toughest stresses and demands.

Petermann products have above average life cycles. With a period of up to 20 years, the guarantees go well beyond the legal stipulations. Most products are also suitable for heavy loads, with some products able to withstand loads of up to 400 kg.

Cost effectiveness
The best offer for you

The modern health economy regards cost effectiveness as the sum of many different factors. Petermann GmbH offers you fair purchase prices for aids with long service lives and also for patient-related disposable products plus many options for taking advantage of Petermann’s expertise product handling and training.

Petermann GmbH is familiar with the requirements in the care sector and it knows that products must also continue to guarantee security of care after many washes and disinfection processes for both users and patients.

Back-friendly movement for patients and relatives
Allow yourself to be “helped” and pay attention to your back!

Petermann products helps all caregivers carry out their activities in a back-friendly manner while gently moving and transferring patients. “It is necessary to make things as simple as possible. But no simpler than that!” reads the Petermann motto, this means making the products available to caregivers and relatives providing care with very different levels of training and experience both simply and effectively.

In order to ensure that everyone can work with our products as efficiently as possible, we offer product training and intensive training plus complete Bella Reha one-day seminars which convey knowledge about practical handling of Petermann products and provide lots of effective, easy-to-apply advice.

Qualified expertise
Put your faith in Petermann quality

Petermann GmbH sees itself as Germany’s pioneer in developing back-friendly aids for caregivers. Experienced product specialists at Petermann GmbH have carried out many thousands of training sessions and seminars in care homes, hospitals, outpatient care facilities and medical institutions over the years. Our key mission is to bring together this knowledge and experience we have acquired at Petermann GmbH and passing it on to you as an integrated patient transfer concept.

The Petermann quality management system is tested and certified by independent bodies. This is how Petermann GmbH ensures complete compliance with the highest quality and safety standards, from production to application.
### Product Overview

#### Alpha® Caremaster

- **Sliding Mat**
  - Item no.: PM-2095
  - Dimensions: 175 x 60 cm
  - Material: PES/Carbon

- **Caremaster XL**
  - Item no.: PM-2097
  - Dimensions: 185 x 70 cm
  - Material: PES/Carbon

#### Alpha® Sliding Mat

- **Sliding Mat**
  - Item no.: PM-1010
  - Dimensions: 190 x 60 cm
  - Material: PES/Carbon

- **Sliding Mat**
  - Item no.: PM-2020
  - Dimensions: 50 x 60 cm
  - Material: Cotton/natural ticking

- **Sliding Mat large**
  - Item no.: PM-1215
  - Dimensions: 110 x 80 cm
  - Material: PES/Carbon

- **Sliding Mat 2 parts**
  - Item no.: PM-2015
  - Dimensions: 25 x 60 cm
  - Material: PES/Carbon

- **Turn Sheet**
  - Item no.: PM-1695
  - Dimensions: 200 x 90 cm
  - Material: Cotton/natural ticking

#### Alpha® Sliding Mat

- **Sliding Mat**
  - Item no.: PM-1210
  - Dimensions: 100 x 70 cm
  - Material: PES/Carbon

- **Sliding Mat large**
  - Item no.: PM-1584
  - Dimensions: 200 x 90 cm
  - Material: Cotton/natural ticking

#### Alpha® Support Belt

- **Support Belt S**
  - Item no.: PM-6013
  - Dimensions: 60–110 cm
  - Material: Nylon

- **Support Belt M**
  - Item no.: PM-6014
  - Dimensions: 72–140 cm
  - Material: Nylon

- **Support Belt L**
  - Item no.: PM-6015
  - Dimensions: 100–160 cm
  - Material: Nylon

#### Alpha® Looped Belt

- **Looped Belt**
  - Item no.: PM-3010
  - Dimensions: 140 x 4 cm
  - Material: Polyester

- **Leg Belt**
  - Item no.: PM-3014
  - Dimensions: 200 x 90 cm
  - Material: Nylon

- **Leg Belt-Extension**
  - Item no.: PM-3018
  - Dimensions: 200 x 90 cm
  - Material: Nylon

- **Magic & Leg Belt bundle**
  - Item no.: PM-3019
  - Dimensions: 200 x 90 cm
  - Material: Nylon

#### Alpha® Lifting Mat

- **Lifting Mat 4 pieces**
  - Item no.: PM-4012
  - Dimensions: 110 x 53 cm
  - Material: Nylon

- **Lifting Mat 6 pieces**
  - Item no.: PM-4016
  - Dimensions: 150 x 53 cm
  - Material: Nylon

#### Alpha® Bed Wedges

- **Bed Wedges**
  - Item no.: PM-8010
  - Dimensions: 2 x Bed Wedges 25 x 22 x 13 cm
  - Material: PU Non-Slip

#### Alpha® Slide Sheet

- **Slide Sheet-Set, consisting of top sheet and fitted sheet**
  - Item no.: PM-1635.1
  - Dimensions top: 200 x 140 cm
  - Dimensions fitted: 200 x 90 cm
  - Material: Cotton

#### Alpha® Transfersystem 400

- **Transfersystem 400**
  - Item no.: PM-1501
  - Dimensions: 220 x 115 cm
  - Material: PES with PVC

#### Alpha® Raising Aid Magic

- **Raising Aid Magic with a flexible holding belt**
  - Item no.: PM-3015
  - Dimensions: 60 x 20 cm

- **Raising Aid default**
  - Item no.: PM-3012
  - Dimensions: 60 x 20 cm
  - Material: Nylon

- **Raising Aid Set**
  - Item no.: PM-3025
  - Dimensions: 60 x 20 cm
  - Material: Nylon

Product Overview

**Alpha® Transfer Seat Swing**
- **Item no.** PM-4035
- **Dimensions** 38 x 43 x 55 cm
- **Material** Nylon

**Alpha® Raising Aid Merlin**
- **Item no.** PM-4035
- **Dimensions** 70–160 cm
- **Material** Nylon

**Alpha® flexible Sliding Board**
- **Sliding Board with rounded edges**
  - **Item no.** PM-5030
  - **Dimensions** 74 x 42 cm
  - **Material** Polyethylene
- **Sliding Board**
  - **Item no.** PM-5050
  - **Dimensions** 74 x 32 cm
- **Children’s Sliding Board**
  - **Item no.** PM-5020
  - **Dimensions** 58 x 32 cm
  - **Material** Polyethylene

**Alpha® Raising Aid Quick**
- **Item no.** PM-6080
- **Dimensions** 145 x 11 cm
- **Material** Nylon

**Alpha® Sliding Mat Wheelchair**
- **Sliding Mat Wheelchair**
  - **Item no.** PM-2078
  - **Dimensions** 130 x 43 cm
  - **Material** Cotton/ natural ticking

**Transfer Bag**
- **Item no.** PM-7170
- **Dimensions** 75 x 43 x 15 cm
- **Material** PES/PPC

**Alpha® Foot Stool**
- **Item no.** PM-6990
- **Dimensions** 72 x 38 x 9,5 cm
- **Material** Polyethylene

**Alpha® Turning Disc**
- **Turning Disc**
  - **Item no.** PM-5080
  - **Dimensions** 40 cm
  - **Material** ABS coated plastic fabric

**Alpha® Soft Turning Disc**
- **Item no.** PM-5070
- **Dimensions** 46 cm
- **Material** Cotton/natural ticking

**X-Ray Mat**
- **X-Ray Crawler**
  - **Item no.** PMF-8265
  - **Dimensions** 32 x 9 cm
  - **Material** Polyethylene
- **X-Ray Crawler-Set 6-parts**
  - **Item no.** PMF-8266
  - **Dimensions** 54 x 42 cm
  - **Material** Nylon/PE

**X-Ray Mat 60 cm**
- **X-Ray Crawler-Set XL 6-parts**
  - **Item no.** PMF-8360
  - **Dimensions** 54 x 57 cm
  - **Material** Nylon/PE
- **X-Ray Crawler XL**
  - **Item no.** PMF-8366
  - **Dimensions** 54 x 60 cm
  - **Material** Polyethylene

**Bed Ladder**
- **Item no.** PM-6090
- **Dimensions** 170 x 8 cm
- **Material** Nylon

**Alpha® Protection Foil**

Alpha® Caremaster
Open Sliding Mat

The Caremaster sliding mat is used for the transfer of patients in seated and supine positions and for turning patients in bed. It assists by providing secure support and momentum to the movement sequence without having to touch the patient in a sensitive area.

Special sizes on request!

Soft padding allows comfortable transfer

The Caremaster with three extra-strong webbed loops can also be used for very heavy persons

Head support for a gentle transfer

= 200 kg
The Alpha sliding mats reduce the frictional resistance while moving the patient. They are particularly helpful in easing patient transfers in bed, into the shower gurney, the wheelchair etc. Depending on the patients functional capacities, the Alpha sliding mat also supports the chest and pelvis for positioning and turning onto the side. Alpha sliding mats can also be used to transfer heavy patients, patients requiring special care and pre-medicated patients from a supine to a prone position.

For the outer surface of the Alpha sliding mat there is a choice between PES/carbon or cotton/natural ticking (PM-1220)

Soft padding allows comfortable transfer

The Alpha sliding mat has body size

The service life of the sliding mat is increased by strong seams

The outer surface of the sliding mat is made of breathable cotton/natural ticking

The Alpha sliding mat is padded so it is soft

The Alpha sliding mat is made of breathable cotton/natural ticking

The Alpha sliding mat is padded so it is soft
Alpha® Sliding Mat

The sliding mat is especially designed for patients who have to be repositioned frequently or who are particularly sensitive to pain and respond any contact or movement with pain.

The sliding mat is particularly used in the bed for turning or positioning a patient on their side or for moving them to the top end. If the patient is unable to move with the sliding mat on their own, a fitted sheet can be placed in the bed as a pull sheet.

The sliding mat has four strong straps at the top. These can be used to fasten it to the slatted frame at the top of the bed, for example to prevent seated patients from slipping down from the bed. It covers the entire width of the bed and ¾ of its length.

Alpha® Turn Sheet

Set 3-parts

The turn sheet consists of three parts: a large fitted sheet which is placed on the mattress, a large sliding sheet and a non-slip mat. The upper side of the sliding sheet is made of cotton/natural ticking.

The turn sheet is used for pain-sensitive patients, heavy patients, and special care patients. Moving and laterally repositioning patients is made much easier. Rolling up the turn sheet against the patients body in a lateral position and then fixing it in place with a bed sheet provides simple and gentle lateral position support.

Alpha® Turn Sheet
Set in several parts

This turn sheet was developed specially for patients who are particularly sensitive to pain. The processing of breathable textile products enables the patient to remain on the turn sheet on an ongoing basis. The hidden handles and loops of the turn sheet make it possible for the carer to move the patient freely and gently to the desired care situation in the bed. The turn sheet can be attached to the head of the bed or laterally to the slatted frame with the attachment straps provided. The stop strips additionally applied to the outside on the fitted sheet and the anti-slip mat provide the necessary safety. All forms of positioning, such as micro positioning or neutral positioning, are possible without effort and shearing forces. All positioning wedges can be placed between the two silk layers. This speeds up and simplifies even complex positioning processes. A transfer to mobile wheelchairs is also possible, simply by pulling the patient over. Support with a sliding board is recommended for this purpose. The turn sheet remains in the wheelchair following transfer and the return transfer can be done just as quickly without hassle.

The stable loops facilitate moving the patient in the bed

---

Alpha® Bed Wedges
Set 3 parts

The bed wedges are designed to actively reposition people requiring nursing care. They provide comfortable support of the patient, depending on the specific nursing needs. The bed wedges are particularly useful to position the body at night as well as to provide safe support in a sitting position on the bed.

Positioning for dressing changes on the rump as well as for basic care and change of incontinence material (safe and stable positioning up to 135°)

Positioning for food intake or to protect the patient from slipping off the desired sitting position in bed

Item no. | Dimensions | PM-8010

PM-2098 Turn Sheet
PM-1584 Fitted Sheet
PM-7010 Non-Slip Mat
Alpha® Slide Sheet

Set 2-parts

The slide sheet is a two-piece aid for reducing the friction when repositioning and moving patients while providing bedside nursing. It consists of a bottom sheet (200 x 90 cm) and a top sheet (200 x 140 cm). With the sliding surface facing up, place the bottom sheet lengthwise across the middle of the bed. Fix the two overhanging ends of the sheet smoothly underneath the mattress. Now place the top sheet with the sliding surface facing down. The top sheet can now be moved into any direction while bearing load. Place your palm between the patient and the sliding surface to gently support rotational or pulling movements.

Alpha® Transfersystem 400

Alpha transfer sheet and PEM disposable sliding foil – transfer system for heavy patients. The transfer sheet on the transfer system 400 can be safely lifted and carried by a maximum of 12 persons. Every carrier loop is attached to the opposite loop in the belt system. The PEM disposable sliding foil is used to assist in moving patients on solid surfaces and bases. Friction can be significantly reduced.

More about the PEM disposable sliding foil on page 55
Alpha® Support Belt

The support belt is made of padded nylon material with non-slip properties inside. It is placed round the patient’s and/or caregiver’s waist and closed with a buckle. The holding belt has a number of grips so the carer can control the flow of movement, for example when transferring a patient to a chair, and support insecure patients. The belt is also a reliable aid for walking. Unsteady patients, for example patients with circulation disorders, can be held properly without having to grab their arms.

Support Belt S
Item no. PM-6013
for waist 60–110 cm

Support Belt M
Item no. PM-6014
for waist 72–140 cm

Support Belt L
Item no. PM-6015
for waist 100–160 cm

Material Nylon

The interior is lined with a non-slip material so it clings to clothing

Vertical and horizontal grips make the handling easier

The buckle is easy to use

The robust outer material is nylon and prolongs the service life of the belt

The carer can also wear a belt in order to provide the patient with a good, secure grip
**Alpha® Raising Aid Magic**

With the Magic lifting aid you can securely hold on to and guide the patient when standing up, sitting down and particularly during transfers. When being used, the simple handling can easily be combined with a back-friendly work method and elements from nursing concepts. The Magic lifting aid can be combined with other aids in various ways, depending on the patient’s needs and functional requirements.

- Extremely stable carrying handles provide additional safety
- With flexible safety harness

With a removable core by means of a clamping fastener and a flexible holding belt

[id: 200 kg]

**Alpha® Looped Belt**

The safety loop belt can be used optionally for patients with limited body tension. It enables also especially the safe transfer for patients that sit in very narrow wheelchairs where the flexible holding belt of the Magic raising aid cannot be applied to the patient from behind.

- Item no. PM-3010
- Dimensions 110 x 4 cm
- Material Polyester with 2 loops including buckles

[id: 200 kg]

**Alpha® Raising and Lifting Aid-Set**

Magic & Leg Belt bundle

The leg belt helps the transfer of a patient into a wheelchair, onto the toilet, a chair or car seat. The leg belt works well in combination with the sliding board, the turn table, the raising aids or the belt. It makes the transfer much more back-friendly for the caregiver, and easier and less intrusive for the patient. The leg belt is used when transferring a seated patient from a bed to a wheelchair or for similar low-level transfer situations. The leg belt facilitates the range of movement and significantly increases the safety of the transfer. The leg belt is gently placed around the legs of the seated patient, below knee level, and fastened with the Velcro fastener. The caregiver then gently places her/his own foot between the patients feet. During transfer, the leg belt locks into position according to the patients endurance and allows the caregiver to stabilize the rotation by placing light counter-pressure on the leg belt. The leg belt can be extended by the leg belt extension (50 cm).

Raising Aid Set PM-3025 Magic (PM-3015) and Leg Strap (PM-3005)

Optimally adjusted by extra wide Velcro fastener
Alpha® Lifting Mat

With the lifting mat it is possible to move a patient lying in bed towards the top end and onto the side, transfer a patient, e.g. from a bed to a shower stretcher, and lift up a patient who has fallen onto the floor. A heavy-duty sliding surface is sewn to the bottom of the transfer sheet. The sliding surface significantly decreases the frictional resistance between the patient and the transfer surface. The lateral sections can easily be folded inwards together with the handles, and with the patient positioned on his side, the transfer sheet can easily be placed under the patient. The inner section of the transfer sheet can be removed so that the transfer sheet can be washed or disinfected. Using the transfer sheet to have several people lift a supine patient from the floor is safer for the patient and friendlier for the backs of those doing the lifting.

Soft padding offers the patient a high level of comfort.

The lifting mat is foldable for an easier placing into the bed.

The lifting mat not only makes it possible to transfer the patient from a patient support to a bed, it also assists carers when lifting the patient off the floor.

Alpha® Transfer Seat Swing

The Swing transfer seat is ideal for controlled transfers of persons on stairs and other transfer situations, particularly where there is no room for mechanical aids. The weight of the patient can be distributed over up to five persons, even of different heights, to save their backs.

Calculation: 180 kg 60°

The stable safety handles make the patient transfer safe and easy.

The transfer seat can be used in difficult situations, for example with stairs.

In combination with the Rollboard Vision, a supine patient can be transferred to the opened transfer seat.
The Petermann Merlin transfer aid, which can optionally be used with a support and/or looped belt, is a simple and safe aid for assisting people with restricted mobility to stand up and change position. The Merlin transfer aid enables carers to transfer patients in an easier, energy-saving and back-friendly manner and it can also mobilise the remaining strength in the patient's arms and legs, if applicable, and also give them a feeling of security. The ingenious design in conjunction with the smooth-running rollers allows a particularly safe and easy handling of the Merlin transfer aid. The use of high-quality rust-free stainless steel also allows maximum stability and keeps disinfection processes even after multiple uses without problems.

Alpha® Transfer Aid Merlin

The Merlin raising aid assists with the support of a patient for sitting and standing or for moving a patient into a wheelchair, onto the toilet or onto a chair. It helps the caregiver to control the movement very effectively and obese patients or unstable or nervous patients can be held more securely. Anxious patients are given a sense of security. The Merlin raising aid is placed round the patient's hips and locked in position with the assistance of the quick-release fastener, the width of which can be adjusted.

Alpha® Pegasus Raising Aid
3-parts

The Pegasus raising aid is always available to assist a person in need to transfer from a supine position to a comfortable seated position alone or with assistance. It is very small, safe, compact and lightweight to handle. The raising aid is ready for immediate use, to support a person after a fall to help transfer them from a supine position into a comfortable sitting position, either by themselves or with familiar help. At home or as an ideal aid for inpatient or outpatient utilization, Pegasus is always ready to provide support and help.

Raising Aid Pegasus 3-parts
Item no. PM-4225
consisting of:
- Raising Aid Pegasus PM-4222
- Raising Aid Quick PM-6080
- Blue Motion Slide BM-0652

Height min. 7 cm
Height max. 42 cm
Standing 36 x 64 cm
Weight 9.5 kg
Material Stainless steel
Operating with a mobile handle

Raising aid is a universal aid with many potential applications. It is ideal for use in conjunction with the sliding board when transferring the patient, e.g. to a wheelchair.

Alpha® Flexible Sliding Board
The sliding board is flexible and has a very smooth surface in order to minimize resistance due to friction. It is used to transfer patients, e.g. from the edge of a bed to a wheelchair, toilet or car seat. The patient does not have to be able to stand up, but can make the change in position while sitting, either with or without assistance.

Flexible Sliding Board with rounded corners
Item no. PM-5030
Dimensions 74 x 32 cm

Flexible Sliding Board
Item no. PM-5050
Dimensions 74 x 32 cm
Material Polyethylene

The flexible sliding board makes it possible to transfer a patient to a wheelchair, toilet or car seat.

Alpha® Flexible Children’s Sliding Board
Item no. PM-5010 (w/o)
Dimensions 58 x 32 cm
Material Polyethylene

The anti-slip strips prevent the board from slipping away from the surface.

Alpha® Raising Aid Quick

The raising aid is a universal aid with many potential applications. It is ideal for use in conjunction with the sliding board when transferring the patient, e.g. to a wheelchair.

Item no. PM-6080
Dimensions 145 x 11 cm
Material Nylon

Removable seat back

Alpha® Flexible Sliding Board Quick

Item no. PM-5010
Dimensions 74 x 24 cm
Material Polyethylene
Suitable for self-acting wheelchair users only

Lightweight and small for on the way
The two loops allow a return to the seating position in a particularly comfortable and ergonomic way with the PM-2078 WC sliding mat.

With loops on the sliding mat WC the user can be pulled back by another person without any major effort.

The outer surface of the sliding mat is made of soft and breathable cotton, the inside is made of nylon.

Material
PES/PVC

The special material of the sliding mat WC prevents the patient from slipping forward.

The sliding WC is attached to the backrest of the wheelchair with loops.

With the sliding mat WC the user is able to move back in a wheelchair or normal chair on their own or with help from a second person. The sliding mat WC prevents the user from slipping forward and thus stabilizes the sitting position. When folded in half, they assist the caregiver with pulling the patient into a sitting position with the loops.

The outer surface of the sliding mat is made of soft and breathable cotton, the inside is made of nylon.

The sliding mat WC is extremely suitable for storing small aids. A total of eight compartments with label fields for identification provide sufficient space for storing the Petermann sliding mats, raising aids, sliding boards etc. The rear of the transfer bag is where plastic hooks are located for attachment to a hospital bed or trolley.

A total of eight compartments with label fields for identification provide sufficient space for storing the Petermann sliding mats, raising aids, sliding boards etc. The rear of the transfer bag is where plastic hooks are located for attachment to a hospital bed or trolley.
**Alpha® Turning Disc**

The turning disc can make transfers between bed and wheelchair easier for patients that are able to stand. The start and stop function of the turning disc allows movements to be precisely controlled. We recommend the use of a turning disc in combination with the foot stool with the Alpha or OnlyU support belts.

The surface is made of non-slip material in order to prevent the feet from slipping.

The turning disc has a grip for carrying it comfortably and spacesaving storage.

**Alpha® Foot Stool**

The foot stool is used to assist the patient when using the toilet and transferring from bed to wheelchair. It increases the surface of support for the patient. The foot stool can be applied on its own or in combination with the turning disc.

The foot stool helps to overcome height differences, e.g. between bed, wheelchair or toilet.
Alpha® Non-Slip Cushion

The non-slip cushion is placed underneath the thighs of a patient seated in bed. A gentle and comfortable supporting and securing function is achieved through the anti-slip properties of the surface. It significantly prevents the patient from sliding into bed from a sitting position.

Non-Slip Mat

The non-slip mat prevents the feet from slipping in bed. A non-slip mat increases the frictional resistance by 100%. When placed underneath the patient’s feet in bed, the non-slip mat helps to prevent slipping while repositioning or raising the patient.

Alpha® Soft Turning Disc

The soft turning disc is a very simple aid that significantly facilitates lateral movements for seated patients, whether alone or with trusted help. For use in a bed, place the turning disc centrally in the bed approx. 25 cm from the edge of the bed. You thus achieve an optimal lying position in the centre of the bed from the turning movement. While in the seating position on the bed always use the height adjustment of the bed to assist with your safety.

Non-Slip Mat

The non-slip mat prevents a patient seated in bed from slipping down.

The soft turning disc is made of breathable cotton.

Alpha® Bed Ladder

The bed ladder acts as a raising aid and it is made of nylon exclusively. Unlike standard bed ladders, the Petermann bed ladder does therefore not lie heavily on the bed and it can be put down quietly. It supports the patient with a physiological pattern of movement when raising the upper part of the body, and finally when reaching an upright seating position.

The bed ladder enables patients to independently pull themselves into a sitting position in bed.

The padded handles allow a secure hold. The grip loops are staggered to make it easier for use.

Non-Slip Mat

Alpha® X-Ray Mat

The Alpha X-ray mat has been specifically designed as an X-ray table pad for repositioning of patients on the X-ray table. The pleasant surface and the padding offer the patient a comfortable support during radiography. The handles on the side of the mat enable one or more nursing staff to adjust its position and the position of the patient without any strain to the back.

**X-Ray Mat 60 cm**
- Item no.: PMF-8200
- Dimensions: 190 x 60 cm
- Material: PVC/Nylon

**X-Ray Mat 85 cm (w/o)**
- Item no.: PMF-8220
- Dimensions: 190 x 85 cm

---

**Alpha® X-Ray Crawler**

The Alpha X-ray crawler is the perfect aid for the professional use of the X-ray cassette on the patient. The innovative concept of the rotating X-ray crawler facilitates and accelerates sliding in the X-ray cassette and represents the next important step in the application of the X-ray cassette on the patient.

In order to meet highest hygienic requirements, the Alpha X-ray crawler can be easily wipe disinfected. The X-ray crawler set also offers a disposable protection foil for the X-ray cassette to allow a save and fast workflow with the Alpha X-ray crawler.

Material Rollboard Polyethylene

Hygienically non-critical and semi-critical applications and places of use
Simple disinfection – cover machine washable up to 60 °C

See Alpha® Rollboard Vision: Page 46

Hygienically semi-critical and critical applications and places of use
Disposable protection foil above the cover for quick, simple handling

Hygienically non-critical and semi-critical applications and types of use
PEM disposable cover, can be used without nylon cover, for quick and straightforward handling

The use of the PEM disposable cover reduces the risk of cross-infections and saves on time and costly disinfection processes
The PEM disposable sliding foil is a tubular sheet which is skin-compatible, tear-resistant, latex free, biocompatible and food-safe. The special composition of the material enhances the high level of slip in daily care. This handling aid is used in clinics and hospitals for all the various patient position changes and transfers. The disposability of the PEM disposable sliding foil means a rapid and particularly hygienic transfer for caregivers so it can be seamlessly integrated into the material administration logistics of a facility. Back-friendly and energy-saving for carers, simple and comfortable for patients – with the PEM disposable sliding foil you reduce friction when you move and/or reposition recumbent or sitting patients. For the most part the sheet reduces the potential hazards when moving patients, as required by health and safety legislation, load-handling regulations and employers liability accident prevention regulations.

incl. basket for replacement foil

Cost Effectiveness

The best offer for you

Modern health care services regard cost effectiveness as the sum of many different factors. In addition to fair purchase prices for aids with long service lives, Petermann GmbH also offers you patient-related disposable products plus many possibilities for calling upon Petermann's know-how in terms of handling products and training.
OnlyU® Disposable Support Belt
5 pack

The Petermann OnlyU disposable support belt provides professional support for moving patients without hygienic risks. The OnlyU disposable support belt remains on the patient during their stay in the clinic and can be disposed of sustainably after use.

With the Petermann OnlyU disposable support belt, the spread of multiresistant and other types of germs is contained and costs for expensive washing and logistical processes are saved.

Evacuation Sheet

The evacuation sheet is used in facilities with patients who are always bedridden. In a rescue situation the Petermann evacuation sheet can very easily and safely be dragged over floors, tiles, carpeting, down stairs and out of the hazardous area by a single person. By holding large belt grips at the top or bottom ends and at the centre of the two sides the mattress is pulled out of the bed and across the floor into a safe zone.

Item no. PM-EVA-7053-H
For bed size length: 190 – 205 cm
width: 80 – 100 cm

Item no. PM-EVA-7053-S
For bed size length: 190 – 205 cm
width: 100 – 140 cm

Material PVC coated polyester fabric
Completely perforated

Suitable for all beds/slatted frames/mattress types

Flame retardant, German TUV approved according to DIN 1865 (Patient handling equipment for rescue services/ambulances), required for evacuation sheets

20 years guarantee

Place the evacuation sheet in the middle of the bed directly on the slatted frame.

Rescue situation: Pull both plugs of the belts out from under the mattress.

Pull the opposite belt straps out from under the mattress. Connect the opposite belt straps by clicking the buckles into place.

Pull the loose end of each belt as strongly as possible.

This way the U-shaped mattress protects the person lying inside.

Grab the large handles of the evacuation sheet at head or leg side to pull the sheet together with the mattress from the bed.

The evacuation sheet and mattress slide over the side of the bed and onto the floor.

If necessary, you can drag the patient downstairs and into a safe area.

The evacuation sheet is ideal for window rescue.
Petermann GmbH meets with the requirements of DIN EN ISO 13485 – medical devices – Quality management systems. Scope of certificate: Design, development and distribution of aids for people of limited mobility.
